Chemical Engineering Research and Design

As part of a cooperative agreement between the Institution of Chemical Engineers (UK) and the Canadian Society for Chemical Engineering, the *table of contents* of each issue of the respective research journals will appear in the other. This journal is available to members of The Canadian Society for Chemical Engineering for $65.00.

Chemical Engineering Research and Design **Vol. 69, No. A6, November 1991**

Special Topic Issue — Process Technology

Contents

433 Editorial

Special Papers

435 Rapid Design Algorithms for Shell-and-Tube and Compact Heat Exchangers.
G. T. Polley, M. H. Panjeh Shahi and M. Picon Nunez

445 Interfacing Heat Exchanger Network Synthesis and Detailed Heat Exchanger Design.
G. T. Polley and M. H. Panjeh Shahi

458 The Flexible Pinch Design method for Heat Exchanger Networks. Part I Heuristic Guidelines for Free Hand Designs.
K. Suaysompol and R. M. Wood

465 The Flexible Pinch Design Method for Heat Exchanger Networks. Part II FLEXNET — Heuristic Searching Guided by the A* Algorithm
K. Suaysompol and R. M. Wood

471 Some Aspects of the Practical Design of Pinch Technology Methods.
I. C. Kemp

480 Shorter Communication On Finding the Most Cost Efficient Strategy for the Separation of Multicomponent Mixtures using a Single Distillation Column.
M. Deter and A. M. Gerrard

483 Synthesis of Flexible Thermally Integrated Distillation Sequences.
P. L. Douglas, S. K. Mallick and R. M. Wagler

492 Targeting Flue Gas Emissions.
R. Smith and O. Delaby

General Paper

506 Oscillatory Flow within Tubes Containing Wall or Central Baffles.
M. E. Mackay, M. R. Mackley and Y. Wang

514 Book Reviews

516 Forthcoming Meetings

518 Contents of October 1991 issue of CJChE

519 List of Referees

520 Index 1991

526 Notes for Authors

Keyword Index — 1991

3-picoline / 4-picoline separation 1320,1327
absorber performance 711
absorption 927,1149
accelerated successive substitution 978
acetone-butanol fermentation 520
acetylene reactor 152
acid gas treating 1357
acid-base equilibrium 1320
active carbon 1149
active surface sites 772
activity decay 1100
adaptation 457

alloy electrodeposition 564
allylation kinetics 340
anaerobic 527
aniline-paraffin 1367
animal cell culture 409
annulus entry region 294
antibody production 429
aqueous slurries 1225
aqueous two phase system 548
aromatic carbon 1087
aromatics hydrogenation 1087
aromatics synthesis 347
augmentation phenomena 281
automatic control 111
axial annular flow 294
azeotropic distillation 1302
batch rectification 377
Bayesian estimation 27
Beckman rerrangement 1096
bends 179
binary, LLE 1367
binary V-L equilibria 794
biodegradation 527
biofilm 527
biofilm reactor linearization 544
biomass 907
bioreactor 409,465
bioreactor settler interaction 534
bioreactors for cell culture 403
bitumen 833
bitumen dissolution 825
blends 619
boiling mechanisms 746
Bombyx mori 457
bond splitting agent 772
Boria modified zeolite 1096
bottleneck identification 58
boundary layer model for combustion 1142
bubble column reactor 325
bubble column 506,1228
bubble columns 390,1382,1389
bubble free aeration 444
bubble point 978
bubble size measurement 474
bubble velocity distributions 1247
bubbles 927
calcined dolomite 1413
CaO 1413
carbon dioxide 1357
carbon dioxide hydrogenation 347
carboxylated polysulfones 1348
Carreau viscosity model 383
carrier 527
cascaded adaptive control 588
catalyst 898,1100
catalyst deactivation 355
catalyst self-poisioning 772
catalytic membranes 1036
catalytic reactions 891
cation rearrangement 371
cell immobilization 450
cell model 1235
cellulose vapour condensate 527
chain scission 611
chemical equilibrium computation 1184
chemostat cultures 429
chitosan 439
chlorobenzene 1193
choked flow 188
chronopotentiometry 571
circulating fluidized bed 130,852
circulating fluidized bed combustion 860
